3M[™] Steri-Vac[™] Sterilizer/Aerator GS Series

3M[™] Steri-Vac[™] Sterilizer/Aerator GS Series is a 100% ethylene oxide sterilization system that is an effective and safe low temperature sterilization method for medical devices and other applications. The GS Series sterilizers, Models GS5 and GS8 are designed for use in health care, and Models GS5X and GS8X for use in life science, medical device, contract sterilization, R&D laboratory applications, and other research and industrial applications for terminal sterilization. The GS Series sterilizers provide control and independent monitoring with state-ofthe-art, compliant mechanical design.

3M[™] EO Abator

The 3M[™] EO Abator is a highly effective device used to catalytically convert 100% ethylene oxide gas exhausted from the 3M[™] Steri-Vac[™] Sterilizer/Aerators GS and GSX Series to CO₂ and water vapor. At normal operating conditions, removal efficiency is 99.9+% (when EO is >100 ppm), virtually eliminating emissions to meet environmental requirements. The 3M EO Abator is designed exclusively for use with 3M[™] Steri-Vac[™] Sterilizer/Aerators GS and GSX Series.
